

Planet Farms, founded in 2018 in Milan, is a leading vertical farming company. It's currently present in the main distribution chains with its line of salads and pesto.

Today the company has 90 employees at the Cavenago di Brianza production plant and the Cinisello Balsamo R&D Center on the outskirts of Milan, as well as offices in Italy (Milan), Portugal (Coimbra), the United Kingdom (London) and the Netherlands (Eindhoven).

We are looking for a for a passionate and committed **Junior Agricultural Technician** to join the Agronomy team and in particular to manage and execute the small vertical farm located inside the Resort Da Vittorio 3 Michelin star restaurant in Brusaporto (BG).

In this role you will be responsible of defining and executing a program of research that defines the growing recipes for baby leaves and other crops in indoor vertical farming, working close to the restaurant chef to define the roadmap of varieties development.

Activities:

- Run the Da Vittorio small vertical farm designing and running experiments in controlled environment
- Collect plant phenotyping and environmental data to drive insights in crop performance
- Analyze data and report experimental results
- Communicate scientific insights to peers and to Head of Agronomy
- Collaborate with external partners

Knowledge:

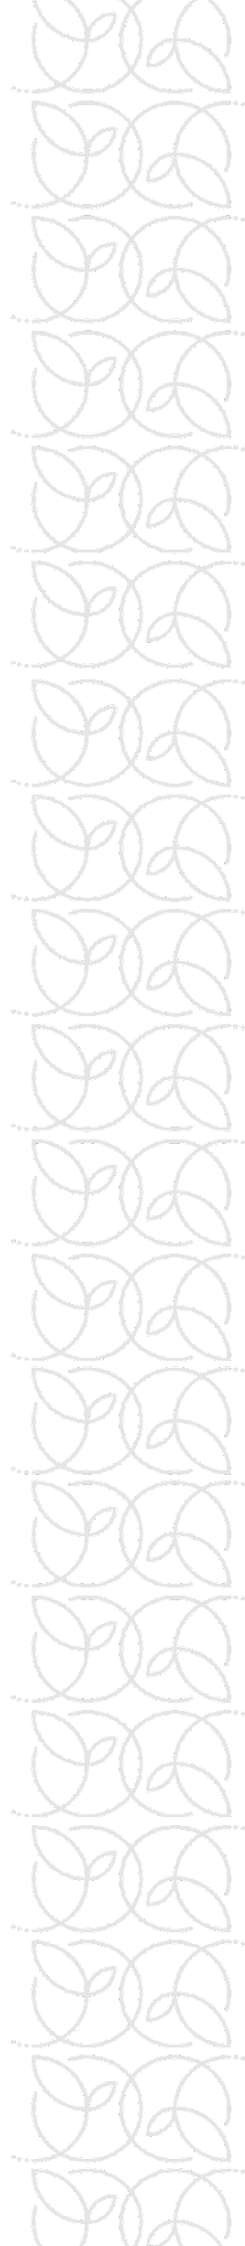

- Extensive knowledge of crop and plant physiology, experimental design and trial with some experience in CEA
- Good knowledge of Internet and Office package including Excel and Power Point
